EMADLANGENI LOCAL MUNICIPALITY
(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019
STATEMENT OF THE ACCOUNTING OFFICER'S RESPONSIBILITY AND APPROVAL

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting and is responsible for the content and integrity of the annual financial statement and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statement fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are responsible for reporting on the fair presentation of the annual financial statements.

The annual financial statements have been prepared in accordance with South African Statement of General Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgment and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These control are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances are above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviours are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

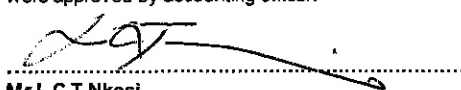

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 JUNE 2019 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future. The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements.

The municipality is wholly dependent on the income from services, rates and grants for continued funding of operations. The financial statements are prepared on the basis that the municipality is a going concern and that the Council has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer is primarily responsible for the financial affairs of the municipality, the accounting officer is supported by the municipality's audit committee, internal and external auditors.

The external auditors are responsible for independently auditing and reporting on the municipality's financial statements. The financial statements were examined by the municipality's external auditors and their report is presented separately.

The annual financial statements set out on page 5 to 53 which have been prepared on the going concern basis, were approved by accounting officer.

.....
Mr L.C.T Nkosi
Municipal Manager

31 AUGUST 2019

1 BASIS OF ACCOUNTING

1.1 BASIS OF PRESENTATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. These annual financial statements have been prepared in accordance with the Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives issued by the Accounting Standards Board in accordance with the Municipal Finance Management Act (Act No 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues, and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statement, unless explicitly stated. The details of any changes in accounting policies are explained in relevant policy.

Accounting policies for material transaction, events or conditions not covered by the above GRAP Standards have been developed in accordance with paragraph 7.11 and 12 of GRAP 3. These accounting policies and the applicable disclosures have been based on the South African Statements of Generally Recognised Accounting Practices including any interpretations of such Statements issued by the Accounting Practices Board.

1.2 PRESENTATION CURRENCY

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality and the figures are rounded off to the nearest rand.

1.3 GOING CONCERN ASSUMPTION

The annual financial statements have been prepared on the assumption that the Municipality will continue to operate as a going concern for at least the next 12 months.

1.4 SIGNIFICANT JUDGEMENT AND SOURCES OF ESTIMATING UNCERTAINTY

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement are inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

1.4.1 TRADE AND OTHER RECEIVABLES/LOANS RECEIVABLES

The municipality assesses its trade receivables and loans and receivables for impairment at each reporting date. In determining whether an impairment loss should be recorded in surplus or deficit, the entity makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables and loans and receivables is calculated on a portfolio basis on the remaining individually impaired items, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

1.4.2 PROVISIONS

Provisions were raised and management determined as estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 18 - Provisions.

1.4.3 ALLOWANCES FOR IMPAIRMENT

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivable's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.4.3 IMPAIRMENT TESTING

The recoverable (service) amounts of individual assets and cash-generating units have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets.

1.4.4 USEFUL LIVES OF PROPERTY, PLANT AND EQUIPMENT AND INTANGIBLE ASSETS

The municipality's management determines the estimated useful lives and related depreciation charges for property, plant and equipment. This estimate is based on the condition and use of the individual assets, in order to determine the remaining period over which the asset can and will be used.

1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECT

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality:

Standard interpretation	Effective Date	Impact
GRAP 34 - Separate Financial Statements	on or after 1 April 2019	No impact is anticipated
GRAP 35 - Consolidated Financial Statements	on or after 1 April 2019	No impact is anticipated
GRAP 36 - Investments in Associates and Joint Ventures	on or after 1 April 2019	No impact is anticipated
GRAP 37 - Joints Arrangements	on or after 1 April 2019	No impact is anticipated
GRAP 38 - Disclosure of Interests in Other Entities	on or after 1 April 2019	No impact is anticipated
GRAP 104 - Financial Instruments	on or after 1 April 2019	No impact is anticipated
GRAP 110 - Living and Non Living Resources	on or after 1 April 2019	No impact is anticipated

The municipality expects to adopt the standard for the first time when the Minister sets effective date for the standards

1.6 PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

1.6.1 INITIAL RECOGNITION

The cost of an item of property, plant and equipment are recognised as assets when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the cost thereof can be measured reliably.

On acquisition date assets are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

1.6.2 SUBSEQUENT MEASUREMENT - COST MODEL

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

1.6.3 DEPRECIATION

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Item	Average useful life
Land	Indefinite
Buildings	10-30 years
Plant and machinery	2-10 years
Furniture and office equipment	2-7 years
Motor vehicles	2-8 years
Computer equipment	2-8 years
Community Assets	2-45 years

The depreciable amount of an asset is allocated on a systematic basis over its useful life.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The residual value, the useful life of an asset and the depreciation method is reviewed annually and any changes are recognised as a change in accounting

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

1.6.4 IMPAIRMENT OF ASSETS

The municipality tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount and an impairment loss is charged to the Statement of Financial Performance.

Irrespective of whether there is any indication of impairment, the municipality also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

1.7.4.1 NON- CASH GENERATING ASSETS

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

If there is any indication that an asset may be impaired the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortization is recognized in surplus or deficit.

An impairment loss is recognized for non-cash generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- > To the assets of the unit, pro-rata on the basis of the carrying amount of each asset in the unit.

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognized in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortization is recognized in surplus or deficit.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

1.6.5 DERECOGNITION

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rental to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available for sale. Proceeds from sale of these assets are recognised as revenue. All cashflows on these assets are included in cash flows from operating activities in the cashflow statement.

1.6.6 ASSETS UNDER CONSTRUCTION

The cost of property, plant and equipment under construction as of the reporting is recognised as an asset if:

- it is probable that the future economic benefits or service potential associated with the item(s) will flow to the municipality.
- the cost or fair value of the item(s) can be measured reliably.

Assets under construction consist of expenditure for the construction of buildings, certain land improvements, infrastructure assets and networks and any other capital projects that are under construction as of the reporting date. The expenditure comprise of direct labour, materials and overheads, if appropriate. When assets under construction is completed and certificates of completion issued, they are transferred to the appropriate asset class.

Assets under construction are not depreciated as they are not in a condition necessary for it to be capable of operating in a manner intended by management.

1.6.7 SITE RESTORATION AND DISMANTLING COST

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as decommissioning, restoration and similar liabilities. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which a municipality incurs either when the item is acquired or a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

In the event that the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- (b) if a decrease in the liability exceeds the carrying amount of an asset, the excess is recognised immediately in surplus or deficit, and;
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on a impairment of cash-generating assets and/or impairment of non-cash generating assets.

1.7 INTANGIBLE ASSETS

1.7.1 INITIAL RECOGNITION

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

1.7.2 SUBSEQUENT MEASUREMENT - COST MODEL

Intangible assets are subsequently carried at cost and impairments. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

1.7.3 AMORTISATION AND IMPAIRMENT

The municipality tests intangible assets for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

1.7.4 DERECOGNITION

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.8 INVESTMENT PROPERTY

1.8.1 INITIAL RECOGNITION

Investment property includes property (land or a building, or part of a building, or both) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

At initial recognition, the municipality measures investment property at cost including transaction costs once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

The cost of self-constructed investment property is the cost at date of completion.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Municipality accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

1.8.2 SUBSEQUENT MEASUREMENT - COST MODEL

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is approved to write down the cost, less estimated residual value over the useful life of the property, which is as follows:

ITEM	USEFUL LIFE
Land	Indefinite
Buildings	2-75 years

Compensation from 3rd parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The municipality discloses relevant information relating to assets under construction or development, in notes to the financial statements.

1.9 HERITAGE ASSETS

Assets are resources controlled by municipality as a result of past events and from which future economic benefits or service potential are expected to flow to the municipality.

Carrying amount is the amount at which an asset is recognised after deducting accumulated impairment losses.

Class of heritage assets means a grouping of heritage assets of a similar nature or function in a municipality's operations that is shown as a single item for the purpose of disclosure in the financial statements.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

An impairment loss of a non-cash generating asset is the amount by which the carrying amount of an asset exceeds its recoverable amount.

An inalienable item is an asset that a municipality is required by law or otherwise to retain indefinitely and cannot be disposed of without consent.

Value in use of non-cash generating asset is the present value of the assets remaining service potential.

1.9.1 RECOGNITION

The municipality recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

1.9.2 INITIAL MEASUREMENT

Heritage assets are measured at cost.

Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of the acquisition.

1.9.3 SUBSEQUENT MEASUREMENT

After recognition heritage assets are carried at cost less accumulated impairment.

1.9.4 IMPAIRMENT

The municipality assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

1.9.5 TRANSFERS

Transfers from the heritage assets are only made when the particular asset no longer meets the definition of a heritage asset.

Transfers to heritage asset are only made when assets meet the definition of a heritage asset.

1.9.6 DERECOGNITION

The municipality derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use.

The gain or loss arising from the derecognition of a heritage asset is included in surplus or deficit when the item is derecognised.

1.10 DIRECTIVE 7 - DEEMED COST

Use of deemed cost for property, plant and equipment, investment property, intangible assets and heritage assets

When an entity initially recognises an asset using the Standards of GRAP, it measures such assets using either cost or fair value at the date of acquisition (acquisition cost). Where the acquisition cost of an asset is not available on the adoption of the Standards of GRAP, acquisition cost is measured using a surrogate value (deemed cost) at the date an entity adopts the Standards of GRAP (measurement date). Deemed cost is determined as the fair value of an asset at the measurement date.

An entity may have determined a deemed cost for an asset under another basis of accounting where information about the acquisition cost of the asset was unavailable. A deemed cost determined for an asset under another basis of accounting is acceptable for purposes of this Directive if it represents the fair value of the asset as or its cost or depreciated historical cost.

The eMadlangeni Municipality did not apply Directive 7 for Property, Plant & Equipment identified after the adoption of GRAP. These assets were identified in the current financial year and a correction of error is to be applied retrospectively a description of whether deemed cost was determined:

(i) using fair value or depreciated replacement cost for items of property, plant and equipment and investment properties; and

1.11 FINANCIAL INSTRUMENTS

1.11.1 CLASSIFICATION

The municipality classifies financial assets and financial liabilities into the following categories:

- Loans and receivables
- Financial liabilities
- Cash and cash equivalents

Classification depends on the purpose for which the financial instruments were obtained and takes place at initial recognition.

The municipality has the following types of financial assets as reflected on the face of the statement of financial position:

Class	Category
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost
Financial asset	Financial asset measured at amortised cost
Cash and cash equivalent	Financial asset measured at amortised cost

The municipality has the following types of financial liabilities as reflected on the face of the statement of financial position:

Class	Category
Trade and other payables from exchange transactions	Financial liability measured at amortised cost
Trade and other payables from non-exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Unspent conditional grants	Financial liability measured at amortised cost
Long term loan	Financial liability measured at amortised cost

1.11.2 INITIAL RECOGNITION

Financial instruments are recognised initially when the municipality becomes a party to the contractual provisions of the instrument.

1.11.3 SUBSEQUENT MEASUREMENT

The municipality measures all financial instruments after initial recognition at amortised cost and subject to impairment review.

1.12 LEASES

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assess the classification of each element separately.

1.12.1 OPERATING LEASES - LESSOR

Operating lease revenue is recognised as revenue on a straight line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of the rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

1.12.2 OPERATING LEASES - LESSEE

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset.

1.13 EMPLOYEE BENEFITS

Employee benefits are all forms of consideration given by the municipality in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party of the municipality, if the proceeds of the policy can be only to pay or fund employee benefits under a defined benefit plan and are not available to the municipality's one creditors (even in liquidation) and cannot be paid to the municipality, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations, or,
- the proceeds are returned to the municipality to reimburse it from employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- the municipality's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

Other long term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefit that are not conditional on future payments.

Composite social security programmes are established by legislation and operate as a multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to their parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

1.13.1 Short-term employee benefits

Short term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short term employee-benefits includes items such as :

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for this absences is due to be settled within 12 months after the end of the reporting period in which the employees render the related employee service;
- non-monetary benefits (for example, medical care and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service;

- as a liability (accrued expense) after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognise that excess as an asset (pre-paid expense) to the extent that the prepayment will lead to, for example a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in case of non-accumulating absences, when absences occurs. The municipality measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

1.13.2 Post-employment benefits

Post-employment benefits are employee benefits (Other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which the municipality provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than estate plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

1.13.3 Multi-employer plans and/or state plans and /or composite social security programmes

The municipality classifies a multi-employer plan and /or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms)

Where a plan is a defined contribution plan, the municipality accounts for in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

1.13.4 Post-employment benefits: Defined benefit plans

Defined benefit plans are post-employment benefits plans other than defined contribution plans.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the entity recognise actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

Current service cost is the increase in the present value of the defined benefit obligation resulting from employee service in the current period.

Interest cost is the increase during a period in the present value as a defined benefit obligation which arises because the benefits are one period closer to settlement.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods resulting in the current period from the introduction of or, changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or a negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the entity recognise past service cost as an expense in the reporting period in which the plan is amended.

The present value of a defined benefit obligation is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods.

The amount recognised as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of a plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement.

The amount recognised as a defined benefit liability may be negative (an asset). The municipality measure the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the plan or reduction in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognised in surplus or deficit.

The entity determine as a defined benefit obligation and the fair value of any plan assets with sufficient regularity such that the amounts recognised in the financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset;

- current service cost;
- interest cost;
- the expected return on any plan assets and on any re-imbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability)

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

The municipality recognise gains and losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on a curtailment or settlement comprises;

- any resulting change in the present value of the defined obligation; and
- any resulting change in the fair value of the plan assets.

1.13.5 Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

1.13.6 Other post retirement obligations

The municipality provides post-retirement health care benefits to some retirees.

The amount recognised as a liability for the long-term employee benefits is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly.

The municipality shall recognise the net total of the following amounts as expense or revenue, except to the extent that another Standard requires or permits their inclusion in the cost of an asset

- current cost
- interest cost;
- the expected return on any plan assets and on any reimbursement right recognised as an asset;
- actuarial gains and losses, which shall all be recognised immediately;
- past service cost, which shall all be recognised immediately; and
- effect of any curtailments or settlements.

1.14 PROVISIONS

Provisions are recognised when;

- the municipality has a present or constructive obligation as a result of past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate of the provision can be made.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

1.15 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met;

- contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- contracts should relate to something other than the routine, steady, state business of the entity - therefore salary commitments relating to employees contracts or social benefit commitments are excluded.

1.16 REVENUE

1.16.1 REVENUE FROM EXCHANGE TRANSACTIONS

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

An exchange transaction is one in which the municipality receives assets or services, or has a liability extinguished and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

1.16.2 Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

1.16.2.1 Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

1.16.2.2 Rendering of services

When the outcome of a transaction involving the rendering of services can be stated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date.

1.16.2.3 Interest, royalties and dividends

Revenue arising from the use by others of entity's assets yielding interest, royalties and dividends or similar distribution is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Royalties are recognised as they are earned in accordance with the substance of the relevant agreements.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

1.16.3 REVENUE FROM NON-EXCHANGE TRANSACTIONS

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represent an increase in net assets, other than increases relating to contribution from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities as determined by a court or other law enforcement body, as a consequence of breach of laws or regulations.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, a municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used but do not specify that future economic benefits or service potentials required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

1.16.3.1 Recognition

An inflow of resources from non-exchange transaction is recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

1.16.3.2 Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also recognised a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

1.16.3.3 Transfers

Apart from service in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

1.16.3.4 Fines

Fines are recognised as revenue when the receivable meets the definition and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

1.16.3.5 Gifts and donations, including goods in-kind

Gifts and donations, including goods in-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

1.16.3.6 Services in-kind

Except for financial guarantee contracts, the municipality recognise services in-kind that are significant to its operations and/or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objective and/or do not satisfy the criteria for recognition, the municipality disclose the nature type of services in-kind received during the reporting period.

1.17 INVESTMENT INCOME

Investment income is recognised on a time-proportion basis using the effective interest method.

1.18 COMPARATIVE FIGURES

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

1.19 UNAUTHORISED EXPENDITURE

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, or in accordance with the purpose of the main division

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

1.20 FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.21 IRREGULAR EXPENDITURE

Irregular expenditure as defined in section 1 of the MFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including-

- (a) this Act; or
- (b) any provincial legislation providing for procurement procedure in that provincial government.

Irregular expenditure that was incurred and identified during the current financial year and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write-off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998), Division of Revenue Act of 2008 or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.22 BUDGET INFORMATION

Municipalities are typically subject to budgetary limits in the forms of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget covers the fiscal period from 1/07/2018 to 30/06/2019.

The financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the statement of comparison of budget and actual amounts.

1.23 RELATED PARTIES

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the national sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not in arms' length or not in the ordinary course of business are disclosed.

EMADLANGENI LOCAL MUNICIPALITY

(Registration number KZN253)

ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2019

1.24 EVENTS AFTER REPORTING DATE

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the annual financial statements are authorised for issue. Two types of events can be identified:

- (a) those that provide evidence of conditions that existed at the reporting date (adjusting events after reporting date); and
- (b) those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality will adjust the amount recognised in the financial statements to reflect adjusting events after reporting date once the event occurred.

The municipality will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

1.25 GRATUITIES

The municipality provides gratuities for qualifying staff members in terms of the relevant conditions of employment. The expenditure is recognised in the statement of financial performance when the gratuity is paid.

1.26 OFFSETTING

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

Year Ended 30 June 2019 - Reconciliation of WIP/Work In Progress

	Opening Balance	Additions	Transfers	Closing Balance
Infrastructure				
Roads and storm water infrastructure	5 727 404	6 555 585		12 282 989
Electricity infrastructure	36 071 246			36 071 246
Community Assets	4 071 918			4 071 918
Total WIP/Work In Progress	45 870 568	6 555 585	-	52 426 153

The municipality has faced challenges in completing the rural electrification project (carrying value R36 071 246). Disputes with farm owners, relating to way leaves on the privately owned land has been a stumbling block. This has contributed negatively to the rural electricity programme progress. Once connections are complete the infrastructure will be handed over to Eskom.

Funding constraints have been faced on the construction of Bensdorp Sportsfield (Carrying value of R4 071 918). When the project was initiated it was envisaged that funding will come from the Department of Sports and Recreation as well as from the Municipal Infrastructure Grant (MIG). However, the MIG funds have not materialised as yet hence the long time its taking to complete the Sportsfield.

15. Employee benefit obligation

Long Service Award

A long service award is granted to municipal employees after the completion of fixed periods of continuous service with the municipality. The provision represents an estimation of the awards to which employees in the service of the municipality may become entitled to in the future, based on the actuarial valuation performed.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out as at 30 June 2019 by ONE PANGAEA EXPERTISE & SOLUTIONS, a Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

At year end 95 2019 employees (2019, 100 employees) were eligible for long-service awards.

The principal actuarial assumptions used were as follows:

Discount rate per annum	8.18%
CPI (Consumer Price Index)	4.92%
Salary increase rate	5.92%
Net discount rate	2.13%

Examples of mortality rates used were as follows:

Average retirement age	65
Mortality during employment	SA85-90

Health Care Benefits

The Municipality provides certain post-retirement health care benefits by funding the medical aid contribution of specific retired members of the municipality, no other retirees are entitled to this benefit. According to the rules of the Medical Aid Fund with which the municipality is associated, a member is entitled to remain a continued member of such a medical fund on retirement and the municipality is liable for certain portion of the medical aid membership fee. The municipality operates an unfunded benefit plan for these specific retirees. No other post-retirement benefits are provided to these retirees.

The most recent actuarial valuations of the present value of the unfunded defined obligation was carried out as at 30 June 2019 by ONE PANGAEA EXPERTISE & SOLUTIONS, a member of Actuarial Society of South Africa. The present value of the defined obligation, and related current service cost and past service cost were measured using the projected unit credit method. No other post retirement medical benefits are provided by the municipality.

Key assumptions used

Discount rate and effective discount rate - Yield curve and yield curve based respectively
CPI (Consumer Price Index)

Assumptions used at the reporting date

Discount rates used	8.42%
Net discount rate	1.74%
Expected increase in health costs	6.57%
Consumer price index	5.07%

Fully accrued retirement age	63
Normal retirement age	65

Mortality rate before retirement has been based on the SA 85-90 mortality tables. These are the most commonly used tables in the industry. Mortality post-employment (for pensioners) has been used on the PA (90) ultimate mortality tables.

16. Unspent Conditional Grants

Repair of 376 Houses	664 485	664 485
FMG Grant	7	7
INEG	484	484
Spatial Planning Grant	477 506	-
Small Town Rehabilitation	-	4 073
	1 142 481	669 048

Movement of grants is disclosed in note 21

These amounts are invested in a ring fenced investment until utilised. All grants are cash backed refer to Note 7.

Unspent conditional grants are made up of (i) the Integrated national Electrification Programme (INEP) grant, (ii) the 376 Houses from Disaster Storm Fund and (iii) Spatial Planning grant.

The condition for INEP grant is specific for the installation of electricity infrastructure to reduce backlog on houses that are not electrified. Minimum size supply is 1.2KVA after Diversity Maximum Demand (ADMD), 20 AMP per household connection.

The 376 houses was initially earmarked for the relief to the households affected by a disaster, subsequently permission was granted to use the funds for renovation.

In terms of the Spatial Planning and Land use Management Act, a Municipality must develop a Land Use Scheme to guide and manage development in the municipal area.

17. Long term loan

DBSA Loan	674 328	750 851
Current portion of long-term loan	84 876	76 523
Long-term portion of loan	589 451	674 328
	674 328	750 851

The municipality acquired a loan from the Development Bank of Southern Africa (DBSA) to fund the construction of municipal main offices. The term of the loan is 20 years. Interest charged is 10.81% per annum payable every half yearly.

18. Provisions

Provision staff salary	-	468 601
Rehabilitation of landfill site	20 523 835	19 067 994
	20 523 835	19 536 595

Reconciliation of provisions for rehabilitation of landfill site

Opening balance	19 067 994	8 382 892
Contribution to provision	1 455 841	10 685 102
Closing balance	20 523 835	19 067 994

The provision is raised for the rehabilitation of waste disposal site to its original state once the site has reached the end of the useful life.

34. Operating lease		
Operating lease payments	85 166	22 462

Municipality leased photocopiers from Newcastle Office up to May 2019, a new appointed service provider has 36 month contract.

Operating lease as lessor

The municipality has low cost houses and flats that are leased to the public and staff. Lease rentals are based on a percentage of the lessee's income levels or on a rate below market value. These leases are cancellable at anytime by either party provided that one's month notice is given and there is no fixed lease period. The related properties are included in property, plant and equipment.

Approved and not contracted for	-	5 375 216
---------------------------------	---	------------------

Total commitments are inclusive of VAT.

38. Contingent liabilities

The municipality is defending various litigation and claim cases against the Municipality. The municipality's Attorney and management strongly believe that the municipality has a strong defence. Should the litigation and claims against the municipality be successful the total estimated liability of all cases is approximately R 8 850 622.29 (2018/2019)

39. Related parties

No related party relationship or transactions existed during the year.

Figures in Rand

2019

2018

40. Risk management**Maximum credit risk exposure**

Credit risk consists mainly of cash deposits, cash and cash equivalents and trade debtors. The only cash with major banks with high quality credit standing and limits exposure to any one counter party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used.

Otherwise, if there is no financial position, past experience and other factors. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards.

Credit guarantee insurance is purchased when deemed appropriate.

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Interest rate risk

As municipality has no significant interest-bearing assets, the municipality's income and operating cashflows are substantially independent of changes in market interest rates.

41. Going concern

The financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

42. Events after the reporting date

There are no events after reporting date.

43. Unauthorised expenditure

Opening balance	33 559 515	11 673 382
Additions for the year	7 546 837	21 886 133
	<u>41 106 352</u>	<u>33 559 515</u>

The expenditure was due to over-spending on the budget line items but the overall expenditure was within the approved budget.

44. Fruitless and wasteful expenditure

Opening balance	216 075	192 738
Less: fruitless and wasteful expenditure duplicately disclosedd in 2017/2018	(15 147)	-
Less: irregular expenditure errorly disclosed as fruitless and wastefi	(40 799)	-
	2 163	23 337
Add: fruitless and wasteful expenditure	<u>162 291</u>	<u>216 075</u>

Fruitless and wasteful expenditure is caused by interest incurred on late payments.

45. Irregular expenditure

		<u>1 676 087</u>

46. Deviations from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the financial statements.

Goods and services were procured during the financial year under review and the process followed in procuring those goods deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations. The aforesaid deviations for 18/19 amounted to R 1 325 631.69 (2017/18 R613 504.36). These were also reported to the Council.

47. Reconciliation between budget and statement of financial performance

The budget is approved on an accrual basis and it covers period from 1 July 2018 to 30 June 2019. The budget and accounting basis are the same therefore financial statement and budget are on comparable basis and a reconciliation is not necessary.

The following councillors had arrear accounts outstanding for more than 90 days at June 2019.

	Outstanding more than 90 days	Total
30 June 2019	R	R
Councillor T.S. Buthelezi	1 912	1 912

49. Electricity losses

Electricity losses in units (kWh) lost in distribution

Electricity units (kWh) purchased	12 666 378	12 526 589
Electricity units (kWh) sold	(9 123 927)	(8 766 269)
	3 542 451	3 760 320

Electricity losses in rands lost in distribution

Electricity purchased	12 422 600	11 484 887
Electricity sold	13 758 404	12 788 694
	(1 335 805)	(1 303 807)

Electricity losses for the period under review is 28% (2018/2019)

These losses are attributable to electricity within the aging and archaic electricity network infrastructure and illegal connections.

50. Biological assets

eMadlangeni Municipality Game Parks' main purpose is the conservation of a representative system of biodiversity encompassing fauna, flora and unique scenery within the Game Park. The Municipality does not manage the Game Park for the reproduction of biodiversity and significant sources of revenue comprise of tourism in the form of accommodation, game viewing and hunting fees. The municipality is involved in biological transformation of fauna and flora primarily as a service to the community for the purpose of recreational activity rather than for sale.

Biological assets are not recognised in the statement of financial position as their fair value or cost of the biological assets cannot be measured reliably due to nature. Quantities of biological assets cannot easily be ascertained as the municipality cannot keep up with births, deaths and migrations of wildlife as dictated by seasonal and other environmental factors. However, the municipality conducts aerial game counts from time to time.
